REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

1001-13 RES

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,251,478 B1, granted June 26, 2001and for which a reissue patent is sought on the invention entitled Sensitive Substance Encapsulation,

the specification of which

☐ is attached hereto.☒ was filed on November 29, 2001 as reissue application number 09/996,636and was amended Nov. 29, 2001 and May 24, 2002
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/2B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming ~~more~~ less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The only independent claim of the original patent (Claim 1) reads as follows:

"1. A method of encapsulating a sensitive material comprising:
plating the sensitive material onto a solid carrier, in an atmosphere inert to the sensitive material, to form a plated material; and encapsulating the plated material."

This claim is unnecessarily limiting. Claim 1 recites "plating the sensitive material onto a solid carrier." The patent discloses and enables additional embodiments which were erroneously not claimed.

In particular, encapsulation by plating "onto a solid carrier" is not required in all the disclosed embodiments. The sensitive material can be encapsulated without the use of a solid carrier.
